

AMENDMENTS TO THE SPECIFICATION

The specification at paragraph [0032] has been rewritten as follows:

[0032] A feed supply tube 22 is preferably integrally molded with the fluid control valve body 12. Feed supply tube 22 preferably includes an outer diameter 24. The outer diameter 24 is preferably in direct communication with the control passage 20, and feed supply tube 22 preferably includes an inner bore 26 in communication with and forming a portion of the supply passage 18 that additionally connects through laterally extending port 28. The feed supply tube 22 is preferably supported in the cavity 16 by at least one or more flying buttress supports 30. Although Fig. 4 depicts four flying buttress supports 30, it should be appreciated that less than, or more than, this number of buttresses may be used in the practice of the present invention. The feed supply tube 22 preferably includes a valve seat receiving area 32.
